Re: Wal-Mart Central City, KY

August 6, 2010

Scott,

I again would like to say Thank You for "coming to the rescue" in such short notice during the last week of our Wal-Mart Project. Not only did you put a crew together in a day's notice, but you put together an outstanding crew who did exactly what you said they would do. Your crew cleaned the 149,704 square foot store and painted the duct work in seven days. This particular store had as much dust and dirt in the ceiling rafters as any store I have encountered. Your work was completed on the sales floor without requiring a return trip which has never been done on any of our jobs! In this tough construction environment, a majority of the general contractors are bidding jobs with the lowest price they can find in order to secure work. Unfortunately, on occasion you get what you pay for. This experience has made us reconsider this practice in estimating. Keep up the good work and we will be sending you request for bids on these project in the future.

Sincerely,

Tom Ellis  
Vice President  
JVK Constructors, LLC
